

# PRECISION PUNCH & TOOLING

Exceptional engineering for extraordinary performance  
in medical manufacturing.

They probably don't realize it, but health care professionals and medical practitioners place their trust in Precision Punch & Tooling every day. That's because medical manufacturers worldwide rely on Precision Punch & Tooling to meet the uncompromising standards of the medical and dental

professions. They know that if it has to be perfect, it has to be Precision Punch & Tooling.

We've built our reputation on perfection. Our expert team of engineers and machinists works with each project from start to finish to assure an outstanding and accurate product. Major medical manufacturers know they can count on our burr blanks to make instruments that meet the meticulous requirements of neurosurgery, otology and orthopaedics with straightness unsurpassed by any other manufacturer.

From inception to inspection, every Precision Punch & Tooling product must meet our incomparable standards of design, materials, qualification, and inspection. Our commitment to excellence is unrivalled in the industry. While some companies simply meet the standards of medical manufacturing, we're the company that set them!

**Our superior manufacturing capabilities include:**

- ISO 13485 certified
- ISO 9001 certified
- Diameters from .004 to 1.25 inches while holding tolerances down to .0001 inches
- Surface finishes down to 3 micro (Ra RMS)
- Precision ground and harden parts ground to virtually any configuration and up to 12 inches long
- Concentricity to .0001 inch

Call us today. We'll show you how Precision Punch & Tooling can make a critical difference in your manufacturing process.

## High Quality Products Made in the U.S.A.

Precision Punch & Tooling Corporation is a premier manufacturer of punches, dies, perforators, and precision ground cylindrical parts. In addition to a full line of standard products, Precision Punch & Tooling manufactures high-precision components to customer specifications.

Every day, for every client, for every project, we dedicate the resources and energy necessary to provide unsurpassed quality of products and service.

We build perfection in every medical component tooling part we manufacture, we never settle for anything less than best.

Our custom capabilities are unmatched. Our team of process engineers will work with you from start to finish. They will evaluate your specifications and design a process using state-of-the-art equipment operated by highly skilled, experienced operators to consistently fulfill your requirements. You can count on us to meet your specifications and exceed your expectations.

## Made in the U.S.A.

With over 44,000 square feet of manufacturing space in our facility in Berlin, CT, we combine the latest in state-of-the-art equipment with almost 50 years of professional manufacturing experience. This results in products that consistently meet the most precise requirements and stand up to the most rigorous demands.

## Partnering

We are committed to developing close and long-term relationships with our customers. These ongoing partnerships enable us to provide optimum value and pricing along with reliable, timely deliveries.

## ISO 9001 Certified/ISO 13485 Certified

ISO 9001 Certification attests to our meeting the international criteria for quality management principles, including a strong customer focus, the motivation and implication of top management, the process approach, and continual improvement. ISO 13485 Certification attests to our meeting the requirements for medical devices and related services that consistently meet customer requirements and regulatory requirements applicable to medical devices and related services.
